Enjoy! - Wood Block Puzzle Team - December 9, 2020 Version 1.8.0 We hope you enjoy playing Block Puzzle Westerly. We've improved the game to make it even better for you... Small bug fixes and performance enhancement (SDK's updates)Keep your mind active and have fun :) Other block games the ads will fill your screen in the middle of a game (which is infuriating), these yet. Ads are in the middle of games that is expected and fine. I would pay to remove ads from this. Also, the blocks slink away instead of exploding which are not so satisfying, but still a good game. Keeper on my ipad. Ta. I agree. The ads are maddening and sometimes the game flips to make an ad when there is still a game. Because the switch goes so fast, it's harder to be sure that this is true. If I found this was true I would definitely play something else. I use this game to cleanse my brain palate between tasks. It is very effective at causing you to focus on efficiently using the blocks that distract your brain from getting stuck in whatever program, project, or workplace problem gives you cause for concern. Don't play it at night before bed for two reasons. First long periods of illuminated devices can interfere with melatonin leading to normal sleep. Secondly, playing this game when you need to sleep becomes very easy, because there is no clock to warn you of the passage of time. The one game mentality takes over and when you finally look up at your alarm and the three A.M. Use this to my go to the game when I had a few minutes to kill, but instead of a relaxed game, I find myself frustrated, more and more. Since the last update, the game crashes. Then you have to start over.... or the piece freezes when you drag it over, and drops where it wasn't meant to go. I used to play it when I couldn't sleep, I would make sure the volume was down, so I wouldn't wake my husband.... just a few of the ads about ride that and come blasting... my husband wakes up... so I will have to find another game similar to this one for all the above issues. I was able to ignore the occasional glitch, but the are too numerous and frustrating making this game aggravating.
